DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1,16,28,29,62 and their dependents, drawn to computing probability of an event being a cause.
 - II. Claims 30, 40, 47,48,70,77 and their dependents, drawn to computing loss/cost.
 - III. Claim 61 and its dependents, broadly drawn to parts of groups 1 and 2.
2. The inventions are distinct, each from the other because of the following reasons:
Group 1 is a combination vs. group 2, group 3 subcombinations; group 2 vs. group 3 subcombinations usable together.
3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

Art Unit: 3639

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
